Rust satchel charge raid guide wow classic map list

It allows you to fight and raid your way to massive amounts of loot or simply defend and control your territory. Without a subpoena, voluntary compliance on the part of your Internet Service Provider, or additional records from a third party, information stored or retrieved for this purpose alone cannot usually be used to identify you. At that point it starts getting slightly more expensive per bullet fired and can fire very few bullets before it breaks so they're no longer useful for raiding.Let's evaluate a single sheet metal door and include all resources used by the top 2 ways of raiding it.63 Explosive Ammo: 1,575 Sulfur but also roughly 500 metal fragments 1 Rocket + 8 Explosive Ammo: 1,600 Sulfur with about 180 metal fragments, 30 low grade fuel, and 2 pipes. This significantly reduces the risk of counters. Having a plan, preparing the right materials, and leveraging splash with cost efficiency will let you keep snowballing. Regardless, saving 1 Rocket and finishing a set of 4 walls with Explosive Ammo is a great way to still deal splash damage but also save on sulfur.Raid Cost Cheat Sheet in VideoRocket Splash on 4x4All 4 walls in the center take full damage, while the adjacent 2 walls on each side take partial damage.Deeper on Explosive AmmoExplosive ammo is incredibly useful as a raiding tool for 2 primary reasons:It is much quieter than rockets and c4, and can be silenced to make it even quieter. In fact, when you normalize the the cost of durability use and repairs to metal fragments by converting high quality metal costs to frags and adding it to the total, it costs about 4-8 metal fragments to fire a single bullet. Considering the cost of the other items, the option with a single rocket and a small amount of explosive ammo is the more resource efficient despite it being slightly more expensive in sulfur and louder. Useful for destroying wood and sheet metal doors. Components are an important part of the equation, but sulfur is generally considered to be the most important. However, it is important to note that you'll also need the 2 pipes and 30 low grade fuel, so there is another type of cost that may be more important to you depending on what your resource constraints are.Raiding a Honeycombed 2x2Let's consider a practical example of raiding a fully completed U-shaped honeycombed 2x2 with an extended airlock, garage doors, stone honeycomb, metal core, armored tool cupboard room. Similarly, Explosive Ammo can also splash 4 walls if shot directly into the center point, but the radius is small and it's easy to not splash all 4 on every bullet. Marketing Marketing The technical storage or access is required to create user profiles to send advertising, or to track the user on a website or across several websites for similar marketing purposes. However, some of these combinations are heavier on components and low grade fuel, so depending on what your constraints are the higher sulfur cost of some raid patterns may be preferred over large amounts of low grade fuel, tech trash, or pipes.Final ThoughtsRaiding efficiently is essential and can easily save you hours of time farming sulfur nodes. In order to get all the loot in the core 2x2, you'd need to raid through one of the following paths:1 stone wall, 1 metal wall, 3 garage doors 2 sheet metal doors, 6 garage doors Consider the different efficiency levels of raiding each of these ways, starting with the wall path:12 C4:26,400 Sulfur 2,400 Metal Fragments 720 Low Grade Fuel 24 Tech Trash 18 Rockets:25,200 Sulfur 1,800 Metal Fragments 540 Low Grade Fuel 36 Pipes 6 C4 + 6 Rockets:21,600 Sulfur 1,800 Metal Fragments 540 Low Grade Fuel 12 Tech Trash 12 Pipes 6 C4 + 4 Rockets + 80 Explosive Ammo:20,800 Sulfur 2,320 Metal Fragments 480 Low Grade Fuel 12 Tech Trash 8 Pipes Let's now consider options for raiding through doors.14 C4:30,800 Sulfur 2,800 Metal Fragments 840 Low Grade Fuel 28 Tech Trash 22 Rockets:30,800 Sulfur 2,200 Metal Fragments 660 Low Grade Fuel 44 Pipes 14 Rockets + 256 Explosive Ammo:26,000 Sulfur 3,704 Metal Fragments 420 Low Grade Fuel 28 Pipes 6 C4 + 2 Rockets + 256 Explosive Ammo:22,400 Sulfur 3,704 Metal Fragments 420 Low Grade Fuel 12 Tech Trash 4 Pipes Raiding this 2x2 in the correct way, properly utilizing the splash damage available in rockets and explosive ammo as well as efficiencies in completing difference door/wall types offers significant sulfur savings. They can even do partial damage to walls beyond those 4. The Satchel charge becomes armed when placed, has a random time until detonation, and has a small chance to malfunction, requiring the user to pick up and rearm. 63 Explosive Ammo: 1,575 Sulfur 1 Rocket + 8 Explosive Ammo: 1,600 Sulfur 4 Satchel Charges: 1,920 Sulfur 1 C4: 2,200 Sulfur Garage Door1 C4 + 40 Explosive Ammo: 3,200 Sulfur 1 C4 + 1 Rocket: 3,600 Sulfur 150 Explosive Ammo: 3,750 Sulfur 2 Rockets + 40 Explosive Ammo: 3,800 Sulfur 3 Rockets: 4,200 Sulfur 9 Satchel Charges: 4,320 Sulfur 2 C4: 4,400 Sulfur Armored Door2 C4: 4,400 Sulfur 1 C4 + 1 Rocket + 35 Explosive Ammo: 4,475 Sulfur 200 Explosive Ammo: 5,000 Sulfur 3 Rockets + 35 Explosive Ammo: 5,075 Sulfur 4 Rockets: 5,600 Sulfur 12 Satchel Charges: 5,760 Sulfur Door Health after 1 RocketJust 8 Explosive Ammo is needed to finish, be careful taking only Rockets to a raid because Sheet Metal Doors will be very inefficient!Sulfur Raid Cost by Wall TypeSimilar to above, let's break down the cost of breaking each wall type.Wood Wall49 Explosive Ammo: 1,225 Sulfur 3 Satchel Charges: 1,440 Sulfur 1 C4: 2,200 Sulfur Stone Wall2 C4: 4,400 Sulfur 185 Explosive Ammo: 4,625 Sulfur 10 Satchels: 4,800 Sulfur 3 Rockets + 30 Explosive Ammo: 4,950 Sulfur 4 Rockets: 5,600 Sulfur 4 C4: 8,800 Sulfur 400 Explosive Ammo: 10,000 Sulfur 7 Rockets + 15 Explosive Ammo: 10,175 Sulfur 23 Satchel Charges: 11,040 Sulfur 8 Rockets: 11,200 Sulfur Armored Wall8 C4: 17,600 Sulfur 799 Explosive Ammo: 19,975 Sulfur 14 Rockets + 30 Explosive Ammo: 20,350 Sulfur 15 Rockets: 21,000 Sulfur 46 Satchel Charges: 22,080 Sulfur It's important to note that while Rocket sulfur costs are often on the more expensive end, they can splash 4 walls for full damage if hit directly at the center point between them. You better get out of there! Building Grade Number of Satchels twig 1 (not recommended) Wood 3 Stone 10 Metal 23 Armored 46 Door Type Number of Satchels Wooden Door 2 Sheet Metal Door 4 Garage Door 9 Armored Door 12 Page views: 35,128Updated: A Long Time Ago We use cookies to optimize our website and our service. A veteran "Rust" degenerate with 3k hours, a rock, and a dream."Raid" Cost GuideSulfur Efficiency in RaidingIn Rust, sulfur is one of the most valuable resources. Raid Chart (values subject to change) The following table compares commonly used explosive devices, in terms of the minimum amount required to destroy a given object: 1 2 4 8 1 1 2 2 1 2 2 2 4 8 15 1 2 3 4 2 3 4 5 16 33 65 2 5 12 16 5 9 15 3 10 23 46 2 4 9 12 4 6 10 13 46 112 223 6 18 42 56 18 26 46 125 250 1000 2000 40 50 120 160 50 250 250 72 289 358 478 19 88 251 334 35 175 433 Small explosive package constructed of beancan grenades. Use them all to your advantage and you can minimize your time with a pickaxe in your hand. A 25k to 30k sulfur cost raid comes down to 20k to 22k sulfur with just a little extra preparedness. Such satchels will not explose and instead require a player to interact with them. This roughly doubles the total metal fragment cost of raiding with explosive ammo. The raw materials required for crafting a Satchel Charge from scratch are: This does not include the necessary Wood used in the Furnace to smelt the ore. It can be very sulfur efficient by itself or in combination with other explosives. This guide covers the efficient ways to raid different doors and materials so that you can keep the violence coming.Sulfur Raid Cost by Door TypeBefore digging into more complexities of all resources involved, let's break down purely the sulfur cost to destroy different types of doors as well as the most sulfur efficient way to do it. It then gets more expensive if you choose to silence the guns. Preferences Preferences The technical storage or access is necessary for the legitimate purpose of storing preferences that are not requested by the subscriber or user. Statistics Statistics The technical storage or access that is used exclusively for statistical purposes. The technical storage or access that is used exclusively for anonymous statistical purposes. To minimize this cost, repair your semi-automatic rifle at least 2 times but not more than 5-6. A full durability semi-automatic rifle can only fire 134 explosive ammo before it breaks. Using it efficiently is a key to your survival, especially after you've spent tons of time farming nodes to get that sulfur. C4 is great for blowing single wall panels where splash isn't needed or armored/garage doors. Crafting Crafting a Satchel Charge requires: 4 Beancan Grenades 1 Small Stash 1 Rope It takes 30 seconds to craft a single Satchel Charge, using the aforementioned raw materials. It may also be the difference in sulfur profit raids that you keep raiding and having to go back to farming.Knowing when to leverage the splash damage of rockets and explosive ammo or the sulfur efficiency of C4 against different types of materials is critical in saving sulfur. —Information accurate as of: build 1263302 Damage and function times Kaboom No description could be found The Satchel Charge is an unreliable raiding tool that can be used to destroy player-made buildings for the purpose of entering other players bases and looting them. Rockets are great for spreading splash damage, and can be further improved by using Explosive Ammo to finish things off. However, it often goes unconsidered that it creates an incredible drain on a gun's durability. When this happens, the satchel is either placed back in the players inventory or reignites with a shorter fuse. Satchel charges have a chance to "dud" when thrown. Functional Functional Always active The technical storage or access is strictly necessary for the legitimate purpose of enabling the use of a specific service explicitly requested by the subscriber or user, or for the sole purpose of carrying out the transmission of a communication over an electronic communications network.
